SUMMARY

Data analyst with a Bachelor's in Math and Ph.D. in Electrical Engineering. Received certification in data analytics from Rice University with advanced skills in Python, MATLAB, SQL implementation and web development. Proven records of applying statistical analysis and predictive modeling to generate simulations to support academic research and business analysis. Excellent written, oral communication, and presentation skills. Enthusiastic to solve complex problems that require mathematical modeling, hardware integration and full-stack web development applications.

TECHNICAL SKILLS

- **Frontend:** HTML, CSS, Bootstrap, JavaScript, Plotly, D3.js, Chart.js, Leaflet.js
 - **Backend:** MySQL, Postgres, MongoDB, Python Flask/Django, Linux bash and cloud technologies (AWS)
 - **Statistical Analysis:** scikit-learn, Pandas, TensorFlow, Excel, MATLAB, MATHEMATICA, STATISTICA
 - **Research:** Authored over 15 research papers with statistical analyzes and Monte Carlo simulation
 - **Teaching:** Created student material and instructed Statistics undergraduate course and Telecom courses
 - **Hardware:** RaspberryPi automation hobbyist, Linux servers (Debian, Ubuntu), Software Defined Radio (SDR)
-

PROJECTS

Earthquakes Sentinel - gpivaro.github.io/leaflet-challenge/ | github.com/gpivaro/leaflet-challenge

Interactive web application that displays all the earthquakes of the last 7 days from the USGS

- Designed an app that allows users to visualize and interact with data about earthquakes and tectonic plates from USGS database.
- Tools used: JavaScript, HTML, CSS, Bootstrap

S&P 500 ETL Project - etl-sp500.herokuapp.com | github.com/gpivaro/Project_ETL

Full-stack web app that display stock price and company information for the S&P 500 list

- Led a team of three in creating a full-stack web app to access stock price and companies info on the S&P500 index
- Tools used: MySQL, Python, HTML, CSS, JavaScript, Bootstrap

Global Air Traffic Live Tracker - gpivaro.github.io/Project_2 | gpivaro.com/airtraffic/

Full-stack web app that display live air traffic information about air crafts and airports all over the world

- Led a team of four in creating a full-stack web app to keep track of live air traffic data
 - Tools used: MySQL, Python, HTML, CSS, JavaScript, Bootstrap
-

EXPERIENCE

Technology Support Specialist, Woodforest National Bank, Houston, Tx

08/2020 – present

- Developed an Excel VBA macro to automate tasks that reduced the time spent on this task in over 1h/day
- Achieved a resolution rate higher than 97% in IT related problems (standard is 85%)

Wireless Communication Researcher, National Institute of Telecommunications, Brazil

06/2016 – 05/2018

- Received substantial monetary funds for research projects by writing request for proposal projects

Visiting Scholar at Electrical and Computational Engineering, Rice University, Houston, Tx

03/2015 – 03/2016

- Co-authored scientific paper published in world-class scientific journal
-

EDUCATION

Data Analytics & Visualization Boot Camp | Rice University, Houston, Tx

01/2021

Ph.D. in Electrical Engineering | State University of Campinas, Brazil

Bachelor's degree in Mathematics | Sao Paulo State University, Brazil
